EXECUTIVE SUMMARY

Results-oriented Web Developer with practical experience in full-stack application development and cloud infrastructure management. Capable of designing, building, and deploying web applications using established technologies including Firebase for database solutions and GitHub for version control and deployment. Committed to systematic problem-solving and continuous professional development.

Proficient in front-end technologies (HTML, CSS) with experience converting technical specifications into functional web applications. Skilled in managing development projects through all phases, from planning and design to deployment and ongoing maintenance. Knowledgeable in cloud-based database systems and version control practices that support code quality and maintainability.

Demonstrates consistent reliability and attention to detail in software development work. Adapts well to team environments while maintaining productive independent work habits. Focused on delivering dependable results, following established best practices, and steadily building technical expertise in web development technologies and methodologies.
